

S W O T

A lovely MGTC; a pretty day, a nostalgic petrol station, and avid drivers.

Are they.....

- Bonnie and Clyde?
- Bill and Hillary?
- Greg and Cindy?

WRONG !! The answer is Greg and Cindy in their 47 TC ! They have owned the car since 1980 when Greg fetched it from Littleton, Colorado in pieces. Over the next several years, a work of mobile art and history came together. However, this is not where MG's started with these two. Unfortunately, too many of us remember the late sixties...sort of synonymous with the late Jurassic period in my daughter's view.

Greg had 56 T-Bird or a TD on his mind originally. By 1969, he had just earned his bachelor's degree and was signing on for more. Greg picked up a 51 TD in the late summer of 69 somewhere in southern Virginia. It was a car that got driven little through the years. He finished his medical residency
